

## Together Straight Ahead

Sanford Hayes / Michael Summers

When passing the distance of time  
I found your light in the night  
And holding your love in my heart  
Memories of you from the start what's going on

Ah O to such a splendored thing  
Love can be cold, hard and fast

I know you can make me  
Part of your life not a part of your past

You've got not to know what's going on  
When it starts messing with your groove  
It's got you feeling not so very strong  
Not knowing just what to do

Together straight ahead, it doesn't matter what's been said

I'm not afraid, I was born to run  
I found your way back to me  
There's been many situations you were coming from  
Was I not there as you were there for me, I say I say O  
I feel the same way too  
When I look into your eyes  
I want our love to grow  
You're a very sexy girl
